### ***Science- Change with the wind of changing time....***

Welcome Readers,

Dentistry and medicine today is drastically different from what it was few years ago. This is an era of super specialization by which clinical skills are fine tuned and professional expertise is enhanced. Multidisciplinary approach to any clinical situation is the need of the hour to provide optimal treatment results.

*JAMDSR* is a journal devoted solely to advance the knowledge and practice of medicine and dentistry. Its goal is to provide the very latest evidence-based information in the realm of medicine and dentistry through high-quality clinical papers, sound research reports and educational features. The journal focuses at manuscripts that include the contribution of any kind to medical and dental sciences. I would like to place my appreciation and thanks to the people who have helped in starting this

new journal. We are particularly grateful to the chief Editor, co-editor worthy reviewers, and the members of editorial board who provided us with a lot of support and advice, and who will continue to represent the journal in their geographical areas. I also take this opportunity to thank all the senior faculty, faculty at the international arena for all the encouragement and the invaluable support in this journey of publishing *JAMDSR*. We are sure that their international reputation and great expertise in the field will have a significant contribution in shaping up the journal and making *JAMDSR* a prestigious journal. The strenuous task of reviewing and selecting the appropriate manuscripts from a huge number for this inaugural issue was made easy to certain extent by the enthusiastic panel of reviewer and editorial board.

The law of nature being to coexist, let us make an honest and sincere attempt to provide the best to our patients by our united efforts. Suggestions to improve the journal to better heights are welcome and will be always very much appreciated.

Yours sincerely,

**Associate Editor**

**Dr. Sandeep Kumar Bains**
